Beside the traditional KGFP connecting elements FERPOL makes products with defined customer requirements to fit into concrete manholes/shafts across Hungary and Romania.

We deliver Our products with BODE rubber sealing (Germany) for best quality.

## **KDU** EXTRA PVC Connecting element

This type is strengthened to improve static rigidity. During installation it resists deformation perfectly.

We can perform customer requirements in terms of length or shape.

Feel free to contact Us with Your special needs!

## **KGFP** PVC Connecting element

These products are mainly for precasted element factories into concrete manholes, but also producing the long ones (L=240 for resellers and PVC pipe producers)

The products can be straight and curved according how to fit inside wall of concrete shafts.
